## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Frederick et al. (US 6,112,502; hereinafter “Frederick”).

Re claims 1 and 3-4: Frederick teaches a system comprising  
a plurality of open shelves containing bins for carrying items, said items having indicia associated therewith;

a handheld device (reading device 542 in fig. 55) programmed to:

read the indicia (358, 364, 366, 370 in fig. 40; “The reading device 348 is preferably a device for reading machine readable indicia such as bar code” (col. 40, lines 62-63)) associated with an item for which a restock is desired (“Alternatively, when all the medical items have been removed from the storage location the user may operate the reading device to read the further indicia adjacent the storage location representative of the condition that all the medical items in the location have been depleted...” col. 6, lines 53-57; col. 41, lines 29-31) (col. 56, lines 51-58; col. 6, lines 12-67; col. 41, line 44 through col. 42, line 53);

receive quantity information associated with the read indicia; and

transfer the information associated with the read indicia and the quantity information to enable a restocking package to be prepared ("These transaction messages are sent to other components of the system..." col. 6, lines 63-67) (figs. 40 and 55; col. 56, line 1 through col. 57, line 49).

Re claim 2: Frederick teaches a cradle (354 in fig. 40) for receiving the handheld device, and wherein the transferring step includes the step of downloading to a central database when the handheld device is stored in the cradle (col. 41, lines 1-24).
